
Montessori Manor

April 2020 Newsletter

Dear Parents,

Montessori Manor will remain open during the COVID-19 pandemic. We are considered an Essential Business and are encouraged to serve the first responders, health care workers, and families that are in need our services. We have taken extra precautions to keep our students and families safe and healthy.

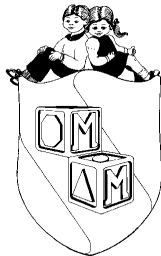

1. More hand washing. Before snack, meals, after using the restroom, after touching the face, and if a student puts their finger in their mouth they wash with soap and water.
2. Hand sanitizers have been made available inside the classroom.
3. We are disinfecting frequently with bleach and other chemicals that kill germs, including our drinking fountains, water containers, tables, rest mats, doors, and other frequently used objects and surfaces.

Two state agencies have contacted us and are encouraging us to stay open and serve the community. They have given us supplies and support.

Parents have also been doing their part and keeping their child home for additional days after being sick.

Although the risk of transmission of the coronavirus is low for the general public, we are taking extra precautions to keep our families safe and healthy.

Thank you for your trust and all your support!

Leslie Dillon, Director
